

WAMPUM BOROUGH
AMENDMENT ORDINANCE No. 333
ROAD ORDINANCE No. 289

It is hereby ordained and enacted by the Wampum borough as follows;

Said Ordinance shall be amended to include Section 17. Excavation of a Distribution Line. When an application is made to open an excavated distribution line consisting of a minimum disturbance of ten (10) feet or more in length, a determination shall be issued by the Borough of Wampum as to whether the entire surface of the roadway shall be resurfaced from the centerline of the roadway to the curb/berm.

Standards of Wampum Borough shall dictate the minimum common area of ten (10) feet for road installation as a result of distribution line excavation. The applicant shall be required to pave one half (1/2) of the street from the centerline of the roadway to the curb/berm. The utilities shall have the option to resurface the entire street instead of the minimum requirement of resurfacing from the centerline to the curb/berm.

This Ordinance Amendment shall become effective five (5) days after its adoption period.
